PROFILE

Passionate and analytical Software Engineering graduate with a fundamental knowledge of software design, development, and testing. Seeking a software engineer position to utilize broad educational background and programming skills, and to continue learning and growing in a collaborative team environment. I am confident that my skills and dedication will enable me to become an asset to any team.

SKILLS

HTML5/CSS3 | Bootstrap | Javascript ECMAScript 2020 | Node.js | GIT/GitHub | Python | Flask | API's | React.js

Flux | SCRUM | SQL/SQLAlchemy | MySQL | Postgress API's | C++

PROFESSIONAL EXPERIENCE

Web Developer   08/2023 – present
Anti-Elixir 🔗   Miami, United States
- Developed and implemented scalable web applications using modern technologies, improving user experience and increasing customer satisfaction.
- Collaborated with cross-functional teams to design and build robust APIs, enabling seamless integration between front-end and back-end systems.
- Identified and resolved bottlenecks, optimizing website performance to achieve faster page load times and improve overall user experience.
- Implemented security measures, including encryption and authentication protocols, to ensure data privacy and protect against potential cyber threats.
- Conducted thorough testing and debugging of software applications to meet client requirements and specifications, delivering high-quality results.

Mentor   06/2023 – present
4Geeks Academy   Miami, United States
- Guided and mentored aspiring full stack developers, providing instruction and support throughout their learning journey.
- Effectively explained complex technical concepts to students, fostering a clear understanding of fundamental principles in web development.
- Demonstrated proficiency in full stack development, including front-end technologies (HTML, CSS, JavaScript, React) and back-end technologies (Python, Ruby, Node.js).
- Assisted students in debugging and troubleshooting code, fostering problem-solving skills and ensuring successful project outcomes.
- Managed student projects, overseeing development processes, coordinating team efforts, and ensuring project milestones and deadlines were met.

Software Developer   02/2023 – present
Freelance   Miami, United States
- Writing code: They need to write high-quality, well-documented code that adheres to industry standards while ensuring that the software is functional and efficient.
- Debugging: Developers are responsible for identifying, diagnosing, and fixing errors, bugs, and technical issues present in the software.
- Testing: They are responsible for validating software applications to ensure they function as required and meet the necessary quality standards.
- Collaborating with the team: Software developers are often required to work with project managers, design teams, and stakeholders in developing applications that meet all requirements.
- Continuously updating knowledge and skills: The tech industry is constantly evolving, and developers must stay up-to-date with new technologies, programming languages, and development practices to be competitive.

EDUCATION

Associate in Arts and Sciences   2010 – present
Miami Dade College   Miami, United States

Full Stack Development   01/2023 – 05/2023
4Geeks Academy   Miami, United States

High School Diploma   2006 – 2010
Miami Norland Senior High School   Miami, United States

PROJECTS

GigHive 🔗   present
- A middle man APP for venues and musicians created from scratch, using back and front end technologies like Python, Flask, SQL, JavaScript, React and APIs. Three person production, pitched for our final project.
